What is a CRT?

A Cathode Ray Tube (CRT) is a specialized vacuum tube in which images are produced and can be found in old TV sets & older styles of computer monitors. Although not banned from Iowa landfills, they contain trace amounts of phosphorus & cadmium, in addition to 6-8 pounds of lead. A CRT appears in the unit as a funnel-shaped leaded glass tube with a metal frame inside. This shape gives older TVs and monitors that big bump in the back!

Not Accepted

- Appliances (washers, dryers, microwaves, refrigerators, freezers, stoves, dehumidifiers, etc)
- Paint (of any kind)
- Motor oil & antifreeze
- Ammunition
- Fire extinguishers & smoke detectors
- Alkaline batteries (AA, 9 volt, etc)
- Asbestos
- Radioactive materials
- Tires
- Non-hazardous waste (please use your weekly garbage service)
- Business waste of any type (please call for a list of vendors that work with local businesses)

Cedar Falls Public Works is located at 1500 Bluff Street in Cedar Falls (near the intersection of Highway 58 & Waterloo Road). On the day of the event, follow the signs from Waterloo Road and East 14th Street to the drop-off site.
